e-Learning Ecologies Bill Cope, Mary Kalantzis, 2017-02-17 e-Learning Ecologies explores transformations in the patterns of pedagogy that accompany e-learning—the use of computing devices that mediate or supplement the relationships between learners and teachers—to present and assess learnable content, to provide spaces where students do their work, and to mediate peer-to-peer interactions. Written by the members of the new learning research group, this textbook suggests that e-learning ecologies may play a key part in shifting the systems of modern education, even as technology itself is pedagogically neutral. The chapters in this book aim to create an analytical framework with which to differentiate those aspects of educational technology that reproduce old pedagogical relations from those that are genuinely innovative and generative of

new kinds of learning. Featuring case studies from elementary schools, colleges, and universities on the practicalities of new learning environments, e-Learning Ecologies elucidates the role of new technologies of knowledge representation and communication in bringing about change to educational institutions.

The IEA Classroom Environment Study Louise Anderson,D.W. Ryan,B.J. Shapiro,2013-10-22 This book reports the design, execution, and results of a cross-national study of classrooms in eight countries. Students were administered tests and completed questionnaires at the beginning and the end of the study. Teachers also completed questionnaires. Classrooms were visited by trained observers on the average of eight times during the study. The data were analyzed in a variety of ways: simple summaries, sequential analyses, and multivariate analyses. The results of these analyses are presented and discussed. Conclusions based on these findings as well as recommendations for further research are presented.

Anna Edes: Novel Dezső Kosztolányi,1993-11-17 Anna Édes is a dark and deeply moving naturalistic novel, a classic work of twentieth-century Hungarian literature. A skillful portrayal of the cruelty and emptiness of bourgeois life, Anna Édes was first published in 1926 and enthusiastically received by the intellectual coffee-house society through which it circulated. The novel was later acknowledged by authors such as Thomas Mann as a model of language and form, and in turn established Dezső Kosztolányi as one of the most significant writers of Eastern European fiction. Anna is the hard-working and long-suffering heroine, the unhappy maid destroyed by her pitiless employers. Her tragic relationship with them is played out against the political turbulence in Budapest following the First World War. Yet her endurance and revenge are depicted with keen psychological as well as historical insight, becoming, in the words of the translator, not merely an argument about social conditions but raised to genuine tragedy.

Creating Shareholder Value Alfred Rappaport,1999-10-13 The ultimate test of corporate strategy, the only reliable measure, is whether it creates economic value for shareholders. Now, in this substantially revised and updated edition of his

1986 business classic, *Creating Shareholder Value*, Alfred Rappaport provides managers and investors with the practical tools needed to generate superior returns. After a decade of downsizings frequently blamed on shareholder value decision making, this book presents a new and indepth assessment of the rationale for shareholder value. Further, Rappaport presents provocative new insights on shareholder value applications to: (1) business planning, (2) performance evaluation, (3) executive compensation, (4) mergers and acquisitions, (5) interpreting stock market signals, and (6) organizational implementation. Readers will be particularly interested in Rappaport's answers to three management performance evaluation questions: (1) What is the most appropriate measure of performance? (2) What is the most appropriate target level of performance? and (3) How should rewards be linked to performance? The recent acquisition of Duracell International by Gillette is analyzed in detail, enabling the reader to understand the critical information needed when assessing the risks and rewards of a merger from both sides of the negotiating table. The shareholder value approach presented here has been widely embraced by publicly traded as well as privately held companies worldwide. Brilliant and incisive, this is the one book that should be required reading for managers and investors who want to stay on the cutting edge of success in a highly competitive global economy.

Neo-Piagetian Theories of Cognitive Development Andreas Demetriou, Michael Shayer, Anastasia Efklides, 2016-07-07

Piagetian theory was once considered able to describe the structure and development of human thought. As a result, it generated an enthusiasm that it could direct education to develop new teaching methods, particularly in science and mathematics. However, disillusionment with Piagetian theory came rather quickly because many of its structural and developmental assumptions appeared incongruent with empirical evidence. In recent years several neo-Piagetian theories have been proposed which try to preserve the strengths of Piaget's theory, while eliminating its weaknesses. At the same time several other models have been advanced originating from different epistemological traditions, such as cognitive/differential psychology or socio-historical approaches. Originally published in 1992, this title was unique in representing most of these theories and traditions. Specifically, the authors focus their work on the educational implications of their research. The chapters are organised in three parts: the first part presents some widely known models of cognitive development and discusses their implications for different aspects of education; the second part is devoted to learning and cognitive acceleration; while part three highlights teaching methods that would improve the acquisition of particular skills in specific areas. Written by an eminent group of truly international contributors, this title will still be useful to students and

researchers in cognitive development and education, as well as educational policy makers.

Human Inquiry Peter Reason,John Rowan,1981-08-25 Sets forth a new paradigm for the philosophy and practice of research in fields of human activity: a collaborative, experimental approach in which inquiry is firmly rooted in subjects' experience of their lives. Covers the philosophy, methodology, practice and prospects of the new paradigm, showing how to do research with people rather than on people. Synthesizes material from researchers pursuing similar paths in Europe, North America, Africa and India as well as relevant reprints and appreciations of classical material.

We Europeans Richard Hill,1997 Describes in an anecdotal and easy-to-read style, supported by research results and input from a wide range of observers, the finer points that distinguish one European culture from another. Provides an entertaining analysis of the attitudes and behavioural traits of each nationality and continues with inter-country comparisons covering such aspects as value systems, attitudes to health, day-to-day living, spare-time preferences and communication habits.

Creating an Excellent School Hedley Beare,Ross H. Millikan,Brian J Caldwell,2019-11 Originally published in 1989. The pursuit of excellence is much discussed with reference to education, but the question remains, 'How can a school become excellent?' This book demonstrates that excellence depends on good management which, in turn, depends not only on a clear understanding of good management theory, but on the ability to translate theory into practice. The authors offer profound insights into three crucial areas of leadership: culture, structure, and public accountability. Drawing on areas outside education, such as advertising and business, they discuss many innovations that are already current - flexitime, the vertical curriculum, mastery learning, community support - and depict ways in which these can be brought together into a total educational experience. More strikingly, however, they look ahead, examining the potential changes to our concept of schooling: for instance those brought about by the growth of information technology. This book emphasises that at the heart of outstanding schooling are visionary leadership, a clear sense of purpose, and creatively conceived and flexible support structures.
