Human Resources in the 21st Century Marc Effron,Robert Gandossy,Marshall Goldsmith,2003-04-30 New and faster technology, redefined values, and shifting customer demands are changing the way businesses operate in the twenty-first century. Human resources and business leaders are faced with the challenge of redefining their strategies on leadership, talent, and diversity, while evaluating their operational effectiveness. This book presents the compelling contributions of thought leaders-such as David Ulrich, Rosabeth Moss Kanter, and Jeffrey Pfeffer-who offer a road map for what these leaders can expect. Renowned HR executives also provide their expert advice and prescriptions for the future. The nature of human resources will continue to evolve as the new century progresses-with this book, HR professionals can change with it. Marc Effron (Darien, CT) is the Global Practice Leader for Hewitt Associates Leadership Practice. His leadership work centers on helping organizations attract, develop and retain top leadership talent. Robert Gandossy (Redding, CT) heads Hewitt's Global Practice Leaders for Talent and has over twenty years' experience in human resources, leadership, and change management. Marshall Goldsmith (Santa Fe, CA) is a founding Director of The Alliance for Strategic Leadership, a consulting organization.

**The Protean Self** Robert Jay Lifton,1999-11 We are becoming fluid and many-sided. Without quite realizing it, we have been evolving a sense of self appropriate to the restlessness and flux of our time. This mode of being differs radically from that of the past, and enables us to engage in continuous exploration and personal experiment. I have named it the 'protean self,' after Proteus, the Greek sea god of many forms.—from The Protean Self A fascinating and appealing book. . . . As he revises the psychology of the self, Dr. Lifton is subtle, even profound, in drawing a line between multiplicity and fragmentation. To those who are nostalgic for the age of the unitary ego, his message is that it is better to be fluid, resilient and on the move than to be firm, fixed, self-assured and settled. To those who worry that the post-modern age is an age of shattered selves, dissociative states, multiple personality disorders and identity diffusion, Dr. Lifton brings the good news that discontinuity can be a mirror of reality, and the standard for a reasonable life.—Richard A. Shweder, New York Times Lifton has challenged the conventional social-scientific wisdom of the last half century. . . .He has called attention to the emergence of a new form of self and considered it in a bold and imaginative light.—Howard Gardner, Boston Book Review

**Laparoscopic Ventral Hernia Repair** Salvador Morales-Conde,2013-12-11 Primary and incisional ventral hernias are common conditions often encountered in surgical practice. Because of the frequency of this problem it has come to be

managed by surgeons in general, regardless of the type of hospital or the conditions dealt with in their daily practice. Laparoscopic surgery has demonstrated to have an important role among the different technique described to repair ventral hernia with less recurrent rate, less morbidity and less overall cost than open conventional repair, with all the advance of the laparoscopic approach. As a result the indications for this surgical technique are currently being debated since the advantages are evident and progressive implementation is ensured. Now is the time to analyze the usefulness, results, technical variants, anatomic, physiologic and scientific basis and implications involved in implementation of laparoscopy as the technique of choice.

**Active Sport Tourism** Heather J. Gibson,Matthew Lamont,Millicent Kennelly,Richard J. Buning,2020-05-21 This volume serves to expand theory-driven understandings of active sport tourism by showcasing five empirical studies examining a variety of active sport tourism contexts. These include table tennis at the World Veteran's Championships, ultramarathon, running/cycling/triathlon, skiing/snowboarding, and a range of issues such as active ageing and travel-related carbon footprints. The volume also seeks to explore possibilities for future directions in active sport tourism and act as a catalyst for ongoing scholarly inquiry. Travelling to take part in active sporting pursuits is growing in popularity around the world. Active sport tourism encompasses travel to participate in a myriad sports, as well as in competitive participatory sport events. Much of the recent growth in active sport tourism is associated with travel to compete in participatory sport events, notably the big city international marathon events; amateur running, triathlon, and cycling events; Masters Games; and team sport tournaments. While the broader sport tourism research literature has tended to focus on spectator-oriented sports events, particularly the mega events such as the Olympic Games, it is only recently that a concerted research agenda in active sport tourism has emerged, making this volume innovative and relevant. This book was originally published as a special issue of the *Journal of Sport & Tourism*.

*Policy Coherence for Sustainable Development 2018* Collectif,2018-05-28 The 2030 Agenda is a universal, collective responsibility that covers all levels: global, national and territorial. To address global policy challenges in a complex and interconnected world, policy coherence will be key. A more coherent multilateral system will be essential to reconcile and deliver the economic, social and environmental transformations needed to achieve the Sustainable Development Goals (SDGs). The 2018 edition of *Policy Coherence for Sustainable Development* shows how integrated and coherent policies, supported by strong institutional mechanisms, can contribute to the "Transformation towards sustainable and resilient societies" – the theme of the 2018 United Nations High-level Political Forum (HLPF). The report applies the institutional,

analytical and monitoring elements of the “policy coherence for sustainable development” framework to identify challenges and opportunities facing governments as they move to implement the SDGs, both at the national level and collectively at the global level. The report suggests eight building blocks for enhancing policy coherence for sustainable development (SDG Target 17.14), and identifies emerging good institutional practices drawing on recent OECD work, country surveys and voluntary national reviews. It includes 19 country profiles and sets out options for tracking progress on policy coherence for sustainable development at the national level.

Pursuing Equal Opportunities Lesley A. Jacobs, 2004 This book offers original and innovative contributions to the debate about equality of opportunity. The first part sets out a theory of equality of opportunity that presents equal opportunities as a normative device for the regulation of competition for scarce resources. The second part shifts the focus to the consideration of the practical application by courts or legislatures or public policy makers of policies for addressing racial, class or gender injustices. The author examines standardized tests, affirmative action, workfare, universal health-care, comparable worth, and the economic consequences of divorce.

**Compasito** Nancy Flowers, Maria Emília Brederode Santos, Zsuzsanna Szelényi, 2007-01-01 Living among other people, in their families and communities, children become aware from a very early age of questions related to justice, and they search for the meaning of the world. By fostering an understanding of human rights, shaping opinion and developing attitudes, human rights education strongly supports this natural interest and learning process. This is what human rights education is about and this is what 'Compasito manual on human rights education for children' is for. 'Compasito' is a starting point for educators, teachers and trainers who are ready to deal with human rights education with children of 7-13 years. The book covers the key concepts of human rights and children's rights, and provides substantial theoretical background to 13 key human rights issues, such as democracy, citizenship, gender equality, environment, media, poverty, and violence. The 42 practical activities serve to engage and motivate children to recognise human rights issues in their own environment. They help children to develop critical thinking, responsibility and a sense of justice, and help them learn how to take action to contribute to the betterment of their school or community. The manual also gives practical tips on how it can be used in various formal and non-formal educational settings.

*Evidence-Based Management* Eric Barends, Denise M. Rousseau, 2018-09-03 Decisions in businesses and organizations are too often based on fads, fashions and the success stories of famous CEOs. At the same time, traditional models and new cutting-edge solutions often fail to deliver on what they promise. This situation leaves managers, business leaders, consultants and policymakers with a profound challenge: how can we stay away from trends and quick fixes, and instead use valid and reliable evidence to support the organization? In response to this problem, evidence-based management has evolved with the goal of improving the quality of decision-making by using critically evaluated evidence from multiple sources

- organizational data, professional expertise, stakeholder values and scientific literature. This book sets out and explains the specific skills needed to gather, understand and use evidence to make better-informed organizational decisions. Evidence-Based Management is a comprehensive guide that provides current and future managers, consultants and organizational leaders with the knowledge and practical skills to improve the quality and outcome of their decision-making. Online resources include case studies, exercises, lecture slides and further reading.

**e-Learning Ecologies** Bill Cope, Mary Kalantzis, 2017-02-17 e-Learning Ecologies explores transformations in the patterns of pedagogy that accompany e-learning—the use of computing devices that mediate or supplement the relationships between learners and teachers—to present and assess learnable content, to provide spaces where students do their work, and to mediate peer-to-peer interactions. Written by the members of the new learning research group, this textbook suggests that e-learning ecologies may play a key part in shifting the systems of modern education, even as technology itself is pedagogically neutral. The chapters in this book aim to create an analytical framework with which to differentiate those aspects of educational technology that reproduce old pedagogical relations from those that are genuinely innovative and generative of new kinds of learning. Featuring case studies from elementary schools, colleges, and universities on the practicalities of new learning environments, e-Learning Ecologies elucidates the role of new technologies of knowledge representation and communication in bringing about change to educational institutions.
