The Airport Business Rigas Doganis, 2005-08-18 The Airport Business provides a helpful overview of the field, examining patterns of ownership for some of the world's largest airports over the past twenty years. Rigas Doganis covers the key issues and economic problems which will affect airport managers during the 1990s: privatization, the growing shortfall in airport capacity, and the need to develop more innovative methods of financing. Doganis analyzes the recent development of traditional cost and revenue systems for aircraft landing fees and passenger charges. He also discusses the differences in airport management between developed and developing countries.

A Practical Guide to Tourism Destination Management World Tourism Organization, 2007 One of UNWTO's top sellers!!! This publication represents a major contribution to developing professionalism in the field of destination management. It is intended as a practical guide, showing how concepts of destination management may be translated into practice. Besides it will be of considerable interest to academics as we acknowledge the work of other experts and academic leaders who have contributed to the field of destination management. As the main purpose of Destination Management Organisations is to attract people to visit in the first place, this practical guide will explain through models, guidelines and snapshot case studies how to create a suitable environment and quality delivery on the ground and how to ensure that visitors' expectations are met at the destination.

The Theory of Collusion and Competition Policy Joseph E. Harrington, Jr., 2017-11-16 A review of the theoretical research on unlawful collusion, focusing on the impact and optimal design of competition law and enforcement. Collusion occurs when firms in a market coordinate their behavior for the purpose of producing a supracompetitive outcome. The literature on the theory of collusion is deep and broad but most of that work does not take account of the possible illegality of collusion. Recently, there has been a growing body of research that explicitly focuses on collusion that runs afoul of competition law and thereby makes firms potentially liable for penalties. This book, by an expert on the subject, reviews the theoretical research on unlawful collusion, with a focus on two issues: the impact of competition law and enforcement on whether, how long, and how much firms collude; and the optimal design of competition law and enforcement. The book begins by discussing general issues that arise when models of collusion take into account competition law and enforcement. It goes on to consider game-theoretic models that encompass the probability of detection and penalties incurred when

convicted, and examines how these policy instruments affect the frequency of cartels, cartel duration, cartel participation, and collusive prices. The book then considers the design of competition law and enforcement, examining such topics as the formula for penalties and leniency programs. The book concludes with suggested future lines of inquiry into illegal collusion.

OECD Employment Outlook 2015 OECD, 2015-07-09 The OECD Employment Outlook 2015 reviews recent labour market trends and short-term prospects in OECD countries, looking at: recent labour market developments, especially around minimum wages; skills and wage inequality; activation policies and inclusive labour markets; and job quality.

Wired for Innovation Erik Brynjolfsson, Adam Saunders, 2009-09-11 Two experts on the information economy explore the true economic value of technology and innovation. A wave of business innovation is driving the productivity resurgence in the U.S. economy. In *Wired for Innovation*, Erik Brynjolfsson and Adam Saunders describe how information technology directly or indirectly created this productivity explosion, reversing decades of slow growth. They argue that the companies with the highest level of returns to their technology investment are doing more than just buying technology; they are inventing new forms of organizational capital to become digital organizations. These innovations include a cluster of organizational and business-process changes, including broader sharing of information, decentralized decision-making, linking pay and promotions to performance, pruning of non-core products and processes, and greater investments in training and education. Innovation continues through booms and busts. This book provides an essential guide for policy makers and economists who need to understand how information technology is transforming the economy and how it will create value in the coming decade.

Tourism and Culture Synergies World Tourism Organization (Unwto), 2018 This report highlights the relationship between tourism and culture and the interdependency of the two sectors. The report, based on a UNWTO survey, affirms that cultural tourism plays a major role in global tourism. It also reveals that the sector transformed lifestyles, created new culture forms and enhanced innovation in technology.

Buddhism, the Internet, and Digital Media Gregory Price Grieve, Daniel Veidlinger, 2014-09-19 *Buddhism, the Internet and Digital Media: The Pixel in the Lotus* explores Buddhist practice and teachings in an increasingly networked and digital era. Contributors consider the ways Buddhism plays a role and is present in digital media through a variety of methods including concrete case studies, ethnographic research, and content analysis, as well as interviews with practitioners and cyber-communities. In addition to considering Buddhism in the context of technologies such as virtual worlds, social media, and mobile devices, authors ask how the Internet affects identity, authority and community, and what effect this might have on the development, proliferation, and perception of Buddhism in an online environment. Together, these essays make the case that studying contemporary online Buddhist practice can provide valuable insights into the shifting role religion plays in

our constantly changing, mediated, hurried, and uncertain culture.

The european higher education area in 2012: Bologna process implantation report Eurydice, 2012 The report describes the state of implementation of the Bologna Process in 2012 from various perspectives and with data ranging from 2010 to 2011 as well as with earlier trends data for some statistical figures. --Ed.

Managing Open Innovation Technologies Jenny S. Z. Eriksson Lundström, Mikael Wiberg, Stefan Hrastinski, Mats Edenius, Pär Agerfalk, 2014-12-14 Open innovation increases the profit of companies and organizations via the input and the adoption of new ideas that are transformed into new processes, products, and services. Yet, how do we ensure that adopters of such innovations focus on relevant problems and use appropriate methods? How should we manage open innovation technologies? How can we exploit distributed knowledge and inventions? And how can we promote them successfully on the market? With valuable lessons to be learned from academic research and industrial experiences of e.g. Intel, Nokia, Philips Healthcare, small municipalities, e-learning platforms and user communities, this book focuses on some of the key dimensions of open innovation and open innovation technologies. It is divided into three themes: theme 1 deals with open innovation as it is in use today, including theoretical underpinnings and lessons from related research fields. Theme 2 analyzes the use of open innovation in organizations today in order to extract best practices. Theme 3 presents forward-looking theoretical research as well as practical future uses of open innovation. Each chapter addresses the particular topics by presenting experiences and results gained in real life projects and/or by empirical research, and clearly states its purpose and how readers are supposed to benefit from it. Overall, the objectives of this book are to advance and disseminate research on systematic open innovation, and to make its results available to practitioners. Thus, the intended target audience includes the international academic community, industrial enterprises, and public authorities.

Straight and Level Stephen Holloway, 2016-12-14 This third edition of Straight and Level thoroughly updates the previous edition with extensive comments on recent industry developments and emerging business models. The discussion is illustrated by current examples drawn from all sectors of the industry and every region of the world. The fundamental structure of earlier editions, now widely used as a framework for air transport management courses, nonetheless remains unchanged. Part 1 of the book provides a strategic context within which to consider the industry's economics. Part 2 is built around a simple yet powerful model that relates operating revenue to operating cost; it examines the most important elements in demand and traffic, price and yield, output and unit cost. Part 3 probes more deeply into three critical aspects of capacity management: network management; fleet management; and revenue management. Part 4 concludes the book by exploring relationships between unit revenue, unit cost, yield, and load factor. Straight and Level has been written primarily for masters-level students on aviation management courses. The book should also be useful to final year undergraduates wanting to prepare for more advanced study. Amongst practitioners, it will appeal to established managers moving from

functional posts into general management. More broadly, anyone with knowledge of the airline industry who wants to gain a deeper understanding of its economics at a practical level and an insight into the reasons for its financial volatility should find the book of interest.

The New Digital Age Eric Schmidt, Jared Cohen, 2013-04-25 'This is the most important - and fascinating - book yet written about how the digital age will affect our world' Walter Isaacson, author of *Steve Jobs* From two leading thinkers, the widely anticipated book that describes a new, hugely connected world of the future, full of challenges and benefits which are ours to meet and harness. The New Digital Age is the product of an unparalleled collaboration: full of the brilliant insights of one of Silicon Valley's great innovators - what Bill Gates was to Microsoft and Steve Jobs was to Apple, Schmidt (along with Larry Page and Sergey Brin) was to Google - and the Director of Google Ideas, Jared Cohen, formerly an advisor to both Secretaries of State Condoleezza Rice and Hillary Clinton. Never before has the future been so vividly and transparently imagined. From technologies that will change lives (information systems that greatly increase productivity, safety and our quality of life, thought-controlled motion technology that can revolutionise medical procedures, and near-perfect translation technology that allows us to have more diversified interactions) to our most important future considerations (curating our online identity and fighting those who would do harm with it) to the widespread political change that will transform the globe (through transformations in conflict, increasingly active and global citizenries, a new wave of cyber-terrorism and states operating simultaneously in the physical and virtual realms) to the ever present threats to our privacy and security, Schmidt and Cohen outline in great detail and scope all the promise and peril awaiting us in the coming decades. A breakthrough book - pragmatic, inspirational and totally fascinating. Whether a government, a business or an individual, we must understand technology if we want to understand the future. 'A brilliant guidebook for the next century . . . Schmidt and Cohen offer a dazzling glimpse into how the new digital revolution is changing our lives' Richard Branson

Responsible Research and Innovation in Industry Konstantinos Iatridis, Doris Schroeder, 2015-09-10 Responsible research and innovation (RRI) is a governance framework promoted by influential policy makers such as the European Commission and academics from the fields of science and technology studies and management. This book is the first text to serve industry. Inspired by existing Corporate Responsibility standards and principles, it offers a selection of tools that can assist practitioners in implementing RRI in business and industry. Responsible Research and Innovation (RRI) is integrative. It is a convergence of Technology Assessment (TA) and Ethics, including corporate responsibility. The task of linking RRI to existing frameworks has only just begun. This book is a welcome example, showing how Corporate Responsibility tools can drive the implementation of RRI. Prof. Armin Grunwald, Head of the Office of Technology Assessment at the German Bundestag and Head of the Institute for Technology Assessment and Systems Analysis, Karlsruhe Institute of Technology, Germany. This is a simple, short, yet encyclopaedic work designed to help business implement RRI using the many tools of

Corporate Responsibility (CR) already in place, everything from ISO9001 to the Ceres Roadmap for Sustainability. It makes clear the ways in which RRI is an extension of ideas already well-developed in CR. I learned a lot reading it. Prof. Michael Davis, Senior Fellow, Center for the Study of Ethics in the Professions, Illinois Institute of Technology, USA Increase the chance of success for your startup's business idea by using your future customers' knowledge about the market! This engagingly written book explains how. Dr Thomas Frenken, CEO oldntec, Germany

Value Creation 4.0 - Marketing Products in the 21st Century Gábor Reketttye, 2019-08-15 Value Creation 4.0 is a marketing guide to the age of the fourth industrial revolution ('Industry 4.0'). This title draws attention to the situation which poses new challenges and risks for the whole of humanity. The book takes an essentially practice-oriented approach. The book intends to highlight the importance of the topic, define its conceptual framework and present its practical applications. The book is therefore primarily recommended for practitioners. The topics of the book together with the supporting exhibits and cases - which also include international dimensions - provide information for them that can help increase their competitiveness. The book can also be very handy in higher education. Whole courses can be built on it, as the book comprises 4 parts and 14 chapters which can provide the basis for lectures. Each part is illustrated with cases, and some of the more than 30 exhibits could be used for the efficient processing of the material and for further reflection.

Responsible Innovation 2 Bert-Jaap Koops, Ilse Oosterlaken, Henny Romijn, Tsjalling Swierstra, Jeroen van den Hoven, 2015-04-30 This book discusses issues regarding conceptualization, governance and implementation of responsible innovation. It treats different approaches to making responsible innovation a reality and it contains new case studies that illustrate challenges and solutions. Research on Responsible Innovation is by its nature highly multidisciplinary, and also proactive, design-oriented and policy-relevant. Until a few years back, the concept of Responsible Innovation was hardly used - nowadays it is increasingly receiving attention from both researchers and policy makers. This is indispensable reading for anyone interested in or working on innovation.

Ageism Todd D. Nelson, 2004 Current findings on the origins and effects of ageism, as well as ways to reduce it.

The Presence of the Word Walter J. Ong, 1967-01-01 This provocative exploration of the nature and history of the word in some of its social, psychological, literary, phenomenological, and religious dimensions argues that the word is initially aural and in the last analysis always remains sound; it cannot be reduced to any other category. Father Ong contends that sound is essentially an event manifesting power and personal presence, and his descriptive analysis of the development of the media of verbal expression, from their oral sources through the laborious transfer to the visual world and then to contemporary means of electronic communication, shows that the predicament of the human word is the predicament of man himself. Examining the close alliance of the spoken word with the sense of the sacred, particularly in the Hebreo-Christian tradition, he reveals that in a world where presence has penetrated time and space as never before, modern man must find the God

who has given himself in the Word which brings man more into the world of sound than of sight.

Tourism Marketing Les Lumsdon,1997 An introduction to marketing within the context of the international tourism industry. Focusing on core marketing theory and practice, this text takes a critical approach to encourage greater depth of learning and includes topics of current interest, such as relationship marketing. Student learning is reinforced by the provision of numerous cases, mini-cases, summaries, reflection points, questions and exercises.

Competition Law, Climate Change & Environmental Sustainability Simon Holmes,Dirk Middelschulte,Martijn Snoep,2021 The consensus is clear - climate change is the defining challenge of our time. Meeting this challenge requires a collaborative and inclusive response from all segments of society - including private businesses. What role then for competition law and policy? This important and timely book gathers academics, enforcers, economists, lawyers, and industry representatives to explore the applications and limitations of EU competition law in achieving environmental sustainability aims in line with the European Commission's Green Deal as well as the UN's Sustainable Development Goals. They identify the challenges of integrating environmental considerations into competition analysis presented by the existing framework, whether through cooperation by businesses, practices by dominant companies, or consideration of sustainability efficiencies in merger assessments. Practical examples across various sectors are also provided, alongside agency views from different jurisdictions, to illustrate how competition policy can facilitate a sustainable economy.

Brand America Simon Anholt,Jeremy Hildreth,2004 This title presents the fascinating story of how the USA became the greatest and most powerful brand of all.
