*New Techniques for Brand Management in the Healthcare Sector* Borges, Ana Pinto,Rodrigues, Paula,2021-01-29  
Irrespective of the legal sphere and type of care (primary, secondary, and continuing), providers must ensure that users receive quality healthcare through the efficient use of resources, responsiveness, affordability, and the equal treatment of patients. Management and marketing have been playing an important role in this sector with the importance of branding growing in the healthcare market. The chance for brand in healthcare is determined by the challenges to increase and improve consumer choice. That's something to which providers and health systems, in general, have not been familiarized. *New Techniques for Brand Management in the Healthcare Sector* is a critical research publication that explores the diffusion of new marketing knowledge, tendencies, and qualitative and quantitative methods for brand management in the private, public, and social health sectors and examines the movement from healthcare as a priceless commodity to one that can be, and is, commodified. Highlighting topics such as e-health, medical tourism, and brand management, this publication is essential for hospital directors, marketers, advertisers, promotion coordinators, brand managers, product specialists, academicians, healthcare professionals, brand strategists, policymakers, researchers, and students.

**Handbook of Technology Application in Tourism in Asia** Azizul Hassan,2022-07-09 It is an undisputed reality that the tourism industry in Asia is getting exposed to more innovative technologies than ever before. This proposed book provides the latest research in the application of innovative technology to the tourism industry, covering the perspectives, innovativeness, theories, issues, complexities, opportunities and challenges. This book, a blend of comprehensive and extensive effort by the contributors and editors, is designed to cover the application and practice of technology in tourism, including the relevant niches. This book focuses on the importance of technology in tourism. This also highlights, in a comprehensive manner, specific technologies that are impacting the tourism industry in Asia, as well as the constraints the industry is facing. The contents of this book deal with distinct topics, such as mobile computing, new product designs, innovative technology usages in tourism promotion, technology-driven sustainable tourism development, location-based apps,

mobility, accessibility and so on. A good number of research studies have conducted outlining the contributions and importance of technologies in tourism, in general. However, the tourism industry of Asia so far has attracted very few researchers. Some contributions have been made but not sufficient. Considering the ongoing trend of technology application in the tourism industry in Asia, very few research attempts have been made aiming to explore diverse aspects. Tourism is expanding enormously across the world, which actually creates more demands for effective technologies. This book will be a reading companion, especially for tourism students in higher academic institutions. This book will also be read by the relevant policy planners and industry professionals. Apart from them, this book will be appreciated by expatriate researchers and researchers having keen interest in the Asian tourism industry.
