Driverless Hod Lipson,Melba Kurman,2017-09-15 When human drivers let intelligent software take the wheel: the beginning of a new era in personal mobility. "Smart, wide-ranging, [and] nontechnical." —Los Angeles Times "Anyone who wants to understand what's coming must read this fascinating book." —Martin Ford, New York Times bestselling author of Rise of the Robots In the year 2014, Google fired a shot heard all the way to Detroit. Google's newest driverless car had no steering wheel and no brakes. The message was clear: cars of the future will be born fully autonomous, with no human driver needed. In the coming decade, self-driving cars will hit the streets, rearranging established industries and reshaping cities, giving us new choices in where we live and how we work and play. In this book, Hod Lipson and Melba Kurman offer readers insight into the risks and benefits of driverless cars and a lucid and engaging explanation of the enabling technology. Recent advances in software and robotics are toppling long-standing technological barriers that for decades have confined self-driving cars to the realm of fantasy. A new kind of artificial intelligence software called deep learning gives cars rapid and accurate visual perception. Human drivers can relax and take their eyes off the road. When human drivers let intelligent software take the wheel, driverless cars will offer billions of people all over the world a safer, cleaner, and more convenient mode of transportation. Although the technology is nearly ready, car companies and policy makers may not be. The authors make a compelling case for why government, industry, and consumers need to work together to make the development of driverless cars our society's next "Apollo moment."

Commercial Dispute Resolution Dr Michael Waring, Solicitor,2011-01-01 Commercial Dispute Resolution provides a thorough, up-to-date and practical examination of how litigation is conducted between commercial enterprises under the Civil Procedure Rules. The text also provides practical guidance on conducting commercial litigation involving a foreign element and explores the increasingly popular use of ADR.

Correspondent Central Banking Model (CCBM) European Central Bank,1998

Bank 4.0 Brett King,2018-08-15 In the final book in the digital "BANK" series, Brett King tackles the topic of whether

banks have a future at all in the emerging, technology embedded world of the 21st century. In 30-50 years when cash is gone, cards are gone and all vestiges of the traditional banking system have been re-engineered in real-time, what exactly will a bank look like? How will we reimagine a bank account, identity, value, assets, investments? hen stepping back from this vision of the future, King and his cadre of 'disruptors' and Fintech mafia chronicle the foundations of this new banking ecosystem today. From selfie-pay in China, blockchain in Africa, self-driving cars with their own bank accounts and augmented reality tech that informs the future design of banking systems, this proves once and for all that we're not in Wall Street anymore Toto. Bank 4.0 is what banking will become. The Russian edition of Bank 4.0 was recognised as the best book by a foreign author (2019) at the Business Book of the Year Award organised by PwC Russia.

A Concise History of European Monetary Integration Horst Ungerer,1997-07-16 A comprehensive, concise--and unique--examination of the history of European monetary integration since the end of World War II, and how this fits into the anticipated economic and monetary union and closer political cooperation of European countries.

CreditRisk+ in the Banking Industry Matthias Gundlach, Frank Lehrbass,2013-03-14 CreditRisk+ is a widely implemented default-mode model of portfolio credit risk, based on a methodology borrowed from actuarial mathematics. This book gives an account of the status quo as well as of new and recent developments of the credit risk model CreditRisk+, which is widely used in the banking industry. It gives an introduction to the model itself and to its ability to describe, manage and price credit risk. This timely book will be an indispensable tool.

Relational Autonomy and Family Law Jonathan Herring,2014-03-11 This book explores the importance of autonomy in family law. It argues that traditional understandings of autonomy are inappropriate in the family law context and instead recommends the use of relational autonomy. The book starts by explaining how autonomy has historically been understood, before exploring the problems with its use in family law. It then sets out the model of relational autonomy which, it will be argued, is more appropriate in this context. Finally, some examples of practical application are presented. The issues raised and theoretical discussion is relevant to any jurisdiction.

The Emergence of Modern Universities In France, 1863-1914 George Weisz,2014-07-14 George Weisz offers a comprehensive analysis of the French university system during the latter half of the nineteenth and early twentieth centuries. Examining the major reforms of higher education undertaken during the Third Republic, he argues that the original thrust for reform came from within the educational system, especially from an academic profession seeking to raise its occupational status. Originally published in 1983. The Princeton Legacy Library uses the latest print-on-demand technology to again make available previously out-of-print books from the distinguished backlist of Princeton University Press. These editions preserve the original texts of these important books while presenting them in durable paperback and hardcover editions. The goal of the Princeton Legacy Library is to vastly increase access to the rich scholarly heritage found in the thousands of books

published by Princeton University Press since its founding in 1905.

A Practical Guide to Tourism Destination Management World Tourism Organization, 2007 One of UNWTO's top sellers!!! This publication represents a major contribution to developing professionalism in the field of destination management. It is intended as a practical guide, showing how concepts of destination management may be translated into practice. Besides it will be of considerable interest to academics as we acknowledge the work of other experts and academic leaders who have contributed to the field of destination management. As the main purpose of Destination Management Organisations is to attract people to visit in the first place, this practical guide will explain through models, guidelines and snapshot case studies how to create a suitable environment and quality delivery on the ground and how to ensure that visitors' expectations are met at the destination.

Social Solidarity and the Gift Aafke E. Komter, 2005 This book brings together two traditions of thinking about social ties: sociological theory on solidarity and anthropological theory on gift exchange. The purpose of the book is to explore how both theoretical traditions may complete and enrich each other, and how they may illuminate transformations in solidarity. The main argument, supported by empirical illustrations, is that a theory of solidarity should incorporate some of the core insights from anthropological gift theory. The book presents a theoretical model covering both positive and negative--selective and excluding--aspects and consequences of solidarity.

Creating Shareholder Value Alfred Rappaport, 1999-10-13 The ultimate test of corporate strategy, the only reliable measure, is whether it creates economic value for shareholders. Now, in this substantially revised and updated edition of his 1986 business classic, *Creating Shareholder Value*, Alfred Rappaport provides managers and investors with the practical tools needed to generate superior returns. After a decade of downsizings frequently blamed on shareholder value decision making, this book presents a new and indepth assessment of the rationale for shareholder value. Further, Rappaport presents provocative new insights on shareholder value applications to: (1) business planning, (2) performance evaluation, (3) executive compensation, (4) mergers and acquisitions, (5) interpreting stock market signals, and (6) organizational implementation. Readers will be particularly interested in Rappaport's answers to three management performance evaluation questions: (1) What is the most appropriate measure of performance? (2) What is the most appropriate target level of performance? and (3) How should rewards be linked to performance? The recent acquisition of Duracell International by Gillette is analyzed in detail, enabling the reader to understand the critical information needed when assessing the risks and rewards of a merger from both sides of the negotiating table. The shareholder value approach presented here has been widely embraced by publicly traded as well as privately held companies worldwide. Brilliant and incisive, this is the one book that should be required reading for managers and investors who want to stay on the cutting edge of success in a highly

competitive global economy.

Selling and Sales Management David Jobber, Geoffrey Lancaster, 2006 A classic text providing thorough and sophisticated treatment of selling and sales management, with an emphasis on the international market.

Handbook of Data Mining and Knowledge Discovery Jan M. Żytkow, 2002 Data mining, or knowledge discovery in databases (KDD), is one of the fastest growing areas in computing application: it offers powerful tools to analyze the many large data bases used in business, science, and industry. Data mining technology searches large databases to extract information and patterns that can be translated into useful applications, such as classifying or predicting customer behavior. This book brings together fundamental knowledge on all aspects of data mining--concepts, theory, techniques, applications, and case studies. Designed for students and professionals in such fields as computing applications, information systems management and strategic research and management, the Handbook is a comprehensive guide to essential tools and technology, from neural networks to artificial intelligence. There is a strong emphasis on real-world case studies in such areas as banking, finance, marketing management, real estate, engineering, medicine, pharmacology, and the biosciences. A much needed resource on one of the fastest growing areas of computer applications--the development and use of tools to analyze, interpret, and make use of the enormous amounts of information stored in the world's databases.

New Frontiers in Social Innovation Research Alex Nicholls, Julie Simon, Madeleine Gabriel, Christopher Whelan, 2015-09-18 This book is open access under a CC BY license. Interest in social innovation continues to rise, from governments setting up social innovation 'labs' to large corporations developing social innovation strategies. Yet theory lags behind practice, and this hampers our ability to understand social innovation and make the most of its potential. This collection brings together work by leading social innovation researchers globally, exploring the practice and process of researching social innovation, its nature and effects. Combining theoretical chapters and empirical studies, it shows how social innovation is blurring traditional boundaries between the market, the state and civil society, thereby developing new forms of services, relationships and collaborations. It takes a critical perspective, analyzing potential downsides of social innovation that often remain unexplored or are glossed over, yet concludes with a powerful vision of the potential for social innovation to transform society. It aims to be a valuable resource for students and researchers, as well as policymakers and others supporting and leading social innovation.

Core-periphery Relations in the European Union José M. Magone, Brigid Laffan, Christian Schweiger, 2016-02-26 Successive Enlargements to the European Union membership have transformed it into an economically, politically and culturally heterogeneous body with distinct vulnerabilities in its multi-level governance. This book analyses core-periphery relations to highlight the growing cleavage, and potential conflict, between the core and peripheral member-states of the Union in the face of the devastating consequences of Eurozone crisis. Taking a comparative and theoretical approach and

using a variety of case studies, it examines how the crisis has both exacerbated tensions in centre-periphery relations within and outside the Eurozone, and how the European Union's economic and political status is declining globally. This text will be of key interest to students and scholars of European Union studies, European integration, political economy, public policy, and comparative politics.

Teleradiology Sajeesh Kumar,Elizabeth Krupinski,2008-07-25 Developments in teleradiology are progressing at great speed. As a consequence, there is a need for a broad overview of the field. This first-ever book on teleradiology is presented in such a way that it should make it accessible to anyone, independent of their knowledge of technology. The text is designed to be used by all professionals, including radiologists, surgeons, nurses and allied health professionals, and computer scientists. In a very short time, driven by technical developments, the field of teleradiology has become too extensive to be covered by only a small number of experts. Therefore, Teleradiology has been written with chapter contributions from a host of renowned international authorities in teleradiology (see the Contents and the Contributors). This ensures that the subject matter focusing on recent advances in teleradiology is truly up to date. Our guiding hope during this task was that as editors of multiple chapters we could still write with a single voice and keep the content coherent and simple. We hope that the clarity of this book makes up for any limitations in its comprehensiveness.

The Self-Regulation of Health and Illness Behaviour Linda Cameron,Howard Leventhal,2012-08-21 Self-regulation theory focuses on the ways in which individuals direct and monitor their activities and emotions in order to attain their goals. It plays an increasingly important role in health psychology research. The Self-regulation of Health and Illness Behaviour presents an up-to-date account of the latest developments in the field. Individual contributions cover a wide range of issues including representational beliefs about chronic illness, cultural influences on illness representations, the role of anxiety and defensive denial in health-related experiences and behaviours, the contribution of personality, and the social dynamics underlying gender differences in adaptation to illness. Particular attention is given to the implications for designing effective health interventions and messages. Integrating theoretical and empirical developments, this text provides both researchers and professionals with a comprehensive review of self-regulation and health.

Flow and Stock Effects of Large-Scale Treasury Purchases Stefania D'Amico,2011-02 This is a print on demand edition of a hard to find publication. Using a panel of daily CUSIP-level data, the authors study the effects of the Federal Reserve's program to purchase \$300 billion of U.S. Treasury coupon securities announced and implemented during 2009. The authors find that each purchase operation, on average, caused a decline in yields in the sector purchased of 3.5 basis points on the days when these purchases occurred (the 'flow effect' of the program). In addition, the program as a whole resulted in a persistent downward shift in the yield curve of as much as 50 basis points (the 'stock effect'), with the largest impact in the 10- to 15-year sector. The coefficient patterns generally support a view of segmentation or imperfect

substitution within the Treasury market. Charts and tables.
