Összehasonlító könyvtárügy Mészárosné Szentirányi Zita, A Pécsi Tudományegyetem Felnőttképzési és Emberi Erőforrás Fejlesztési Kar Könyvtár- és Információtudományi Intézete az informatikus könyvtáros mesterképzés keretében oktatja az összehasonlító könyvtártudomány c. kurzust. A tárgy legfontosabb feladata, hogy a hallgatók megismerjék a különböző országok könyvtárügyének fejlődését, az abban meglévő hasonlóságokat és különbségeket. Ennek során részletesen megismerik a közkönyvtárak fejlődésének a világ országainak könyvtárügyére ható két nagy irányzatát: a public library, valamint a népkönyvtári típusú fejlődési folyamatokat. A tantárgy célja, hogy a hallgatók megismerjék a két fejlődési út sajátosságaiból adódó, máig ható könyvtárügyi, könyvtárpolitikai folyamatokat, továbbá azokat az ismérveket, amelyek a könyvtártudomány kialakulásában, értelmezési folyamataiban és alkalmazásában kimutathatók. A kötetben azokat a tanulmányokat jelentettük meg, amelyek témájukban illeszkednek a tantárgy tematikájához, illetve amelyek ennek a képzésnek a hatására születtek az intézet oktatóinak és hallgatóinak tollából. A kötet megjelentetésének több fontos célkitűzése van. Egyrészt tankönyvet, segédanyagot szeretnénk adni a leendő hallgatók kezébe, illetve publikációs lehetőséget biztosítani a legkiválóbbak számára, ezzel is szolgálva a tehetséggondozás ügyét. Másrészt ajándéknak szánjuk a kurzus ihletőjének, hogy lássa munkája gyümölcsét, illetve bemutassuk szakmai műhelyünk eredményeit. Végül, de nem utolsó sorban az egész magyar könyvtáros szakmai közönségnek és minden érdeklődőnek szeretnénk bemutatni néhány érdekes és tanulságos példát a nagyvilágból, ezzel is gazdagítva látókörüket, perspektíváikat, segítve a szakma fejlődését. Ez utóbbi tekintetben kötetünk hiánypótló a magyar könyvpiacra, reményeink szerint sokak érdeklődését felkelti nemcsak a könyvtáros szakma képviselőiét, és hozzájárul a könyvtárakról a társadalomban kialakult kép árnyaltabbá tételéhez.

Marketing: A Relationship Perspective (Second Edition) Hollensen Svend,Opresnik Marc Oliver,2019-03-15 Marketing: A Relationship Perspective is back for a second edition and continues to set a benchmark for achievement in introductory marketing courses across Europe. It is a comprehensive, broad-based, and challenging basic marketing text, which describes and analyzes the basic concepts and strategic role of marketing and its practical application in managerial decision-making. It integrates the 'new' relationship approach into the traditional process of developing effective marketing plans. The book's structure fits to the marketing planning process of a company. Consequently, the book looks at the marketing management process from the perspective of both relational and transactional approach, suggesting that a company should, in any case, pursue an integrative and situational marketing management approach. Svend Hollensen's and Marc Opresnik's holistic approach covers both principles and practices, is drawn in equal measure from research and application, and is an ideal text for students, researchers, and practitioners alike.

Remote Work Revolution Tsedal Neeley, 2021-03-30 LONGLISTED FOR THE FINANCIAL TIMES & MCKINSEY BUSINESS BOOK OF THE YEAR "I often talk about the importance of trust when it comes to work: the trust of your employees and building trust with your customers. This book provides a blueprint for how to build and maintain that trust and connection in a digital environment." —Eric S. Yuan, founder and CEO of Zoom A Harvard Business School professor and leading expert in virtual and global work provides remote workers and leaders with the best practices necessary to perform at the highest levels in their organizations. The rapid and unprecedented changes brought on by Covid-19 have accelerated the transition to remote working, requiring the wholesale migration of nearly entire companies to virtual work in just weeks, leaving managers and employees scrambling to adjust. This massive transition has forced companies to rapidly advance their digital footprint, using cloud, storage, cybersecurity, and device tools to accommodate their new remote workforce. Experiencing the benefits of remote working—including nonexistent commute times, lower operational costs, and a larger pool of global job applicants—many companies, including Twitter and Google, plan to permanently incorporate remote days or give employees the option to work from home full-time. But virtual work has its challenges. Employees feel lost, isolated, out of sync, and out of sight. They want to know how to build trust, maintain connections without in-person interactions, and a proper work/life balance. Managers want to know how to lead virtually, how to keep their teams motivated, what digital tools they'll need, and how to keep employees productive. Providing compelling, evidence-based answers to these and other pressing issues, *Remote Work Revolution* is essential for navigating the enduring challenges teams and managers face. Filled with specific actionable steps and interactive tools, this timely book will help team members deliver results previously out of reach. Following Neeley's advice, employees will be able to break through routine norms to successfully use remote work to benefit themselves, their groups, and ultimately their organizations.

*Global Entrepreneurship and Development Index 2018* Zoltán J. Ács, László Szerb, Esteban Lafuente, Ainsley Lloyd, 2018-11-27 This brief presents a detailed look at the entrepreneurial ecosystem of nations around the world by combining individual data with institutional components. Presenting data from the 2018 Global Entrepreneurship and Development Index (GEDI), which measures the quality and scale of entrepreneurial process from 137 countries world-wide, this book provides a rich understanding of entrepreneurship and a more precise means to measure it. The novelty of the GEDI 2018 edition is the examination of the connection between the GEDI score and the computed total factor productivity (TFP) values. The Global Entrepreneurship and Development Index is an annual index (composite indicator) that measures the health of the entrepreneurship ecosystems in a given country. The authors have identified 14 components (or pillars) that

are important for the health of entrepreneurial ecosystems, identified data to capture each , and used this data to calculate three levels of scores for a given country: the overall GEDI score, scores for Individuals and Institutions, and pillar level scores (which measure the quality of each of the 14 components).
