*Democratic Control of Intelligence Services* Marina Caparini, 2016-05-13 The events of September 11, 2001 sharply revived governmental and societal anxieties in many democratic countries concerning the threats posed by terrorism, organized crime, the proliferation and use of weapons of mass destruction, and other complex security threats. In many countries, public discourse of subjects traditionally considered part of social policy, such as immigration and asylum, have been securitized, while intelligence services have been granted greater resources and expanded powers. This comprehensive volume discusses the various challenges of establishing and maintaining accountable and democratically controlled intelligence services, drawing both from states with well-established democratic systems and those emerging from authoritarian systems and in transition towards democracy. It adopts a multidisciplinary and comparative approach, identifying good practices to make security services accountable to society and its democratic representatives. The volume will engage both academics and practitioners in the discussion of how to anchor these vital yet inherently difficult to control institutions within a firmly democratic framework. As such, it has clear relevance for those concerned with the control and oversight of intelligence and security issues in many countries.

The Study of Public Management in Europe and the US Walter Kickert, 2007-12-05 This book presents an overview of the scientific study of public management, gathering together some of the most authoritative experts in this area of study in Europe and the United States, writing specifically about their respective countries. These essays seek to present the national distinctiveness of the study of public management, in the context of specific state administration. This book goes further than some previous books concerning public management by highlighting the underlying differences between Europe and the United States and amongst European countries, in relation to their particular political-administrative circumstances. The aim of this book is to establish a dialogue between Anglo-American and European approaches to public management, to

encourage readers to see their own national ideas and practises in contrast to others and foster leaning by asking repeatedly 'compared to what?'

**The EU General Data Protection Regulation (GDPR)** Christopher Kuner,2019-06-13 This new book provides an article-by-article commentary on the new EU General Data Protection Regulation. Adopted in April 2016 and applicable from May 2018, the GDPR is the centrepiece of the recent reform of the EU regulatory framework for protection of personal data. It replaces the 1995 EU Data Protection Directive and has become the most significant piece of data protection legislation anywhere in the world. The book is edited by three leading authorities and written by a team of expert specialists in the field from around the EU and representing different sectors (including academia, the EU institutions, data protection authorities, and the private sector), thus providing a pan-European analysis of the GDPR. It examines each article of the GDPR in sequential order and explains how its provisions work, thus allowing the reader to easily and quickly elucidate the meaning of individual articles. An introductory chapter provides an overview of the background to the GDPR and its place in the greater structure of EU law and human rights law. Account is also taken of closely linked legal instruments, such as the Directive on Data Protection and Law Enforcement that was adopted concurrently with the GDPR, and of the ongoing work on the proposed new E-Privacy Regulation.

Women, Family, and Gender in Islamic Law Judith E. Tucker,2008-10-16 An exploration of Islamic law from the perspective of women and gender.

National cyber security : framework manual Alexander Klimburg,2012 What, exactly, is 'National Cyber Security'? The rise of cyberspace as a field of human endeavour is probably nothing less than one of the most significant developments in world history. Cyberspace already directly impacts every facet of human existence including economic, social, cultural and political developments, and the rate of change is not likely to stop anytime soon. However, the socio-political answers to the questions posed by the rise of cyberspace often significantly lag behind the rate of technological change. One of the fields most challenged by this development is that of 'national security'. The National Cyber Security Framework Manual provides detailed background information and in-depth theoretical frameworks to help the reader understand the various facets of National Cyber Security, according to different levels of public policy formulation. The four levels of government--political, strategic, operational and tactical/technical--each have their own perspectives on National Cyber Security, and each is addressed in individual sections within the Manual. Additionally, the Manual gives examples of relevant institutions in National Cyber Security, from top-level policy coordination bodies down to cyber crisis management structures and similar institutions.--Page 4 of cover.

**Computers, Surveillance, and Privacy** David Lyon,Elia Zureik,1996 Computers, Surveillance, and Privacy was first published in 1996. Minnesota Archive Editions uses digital technology to make long-unavailable books once again accessible,

and are published unaltered from the original University of Minnesota Press editions. From computer networks to grocery store checkout scanners, it is easier and easier for governments, employers, advertisers, and individuals to gather detailed and sophisticated information about each of us. In this important new collection, the authors question the impact of these new technologies of surveillance on our privacy and our culture. Although surveillance-literally some people watching over others-is as old as social relationships themselves, with the advent of the computer age this phenomenon has acquired new and distinctive meanings. Technological advances have made it possible for surveillance to become increasingly global and integrated-both commercial and government-related personal data flows more frequently across national boundaries, and the flow between private and public sectors has increased as well. Addressing issues of the global integration of surveillance, social control, new information technologies, privacy violation and protection, and workplace surveillance, the contributors to *Computers, Surveillance, and Privacy* grapple with the ramifications of these concerns for society today. Timely and provocative, this collection will be of vital interest to anyone concerned with resistance to social control and incursions into privacy. Contributors: Jonathan P. Allen, Colin J. Bennett, Simon G. Davies, Oscar H. Gandy Jr., Calvin C. Gotlieb, Rob Kling, Gary T. Marx, Abbe Mowshowitz, Judith A. Perrolle, Mark Poster, Priscilla M. Regan, James B. Rule. David Lyon is professor of sociology at Queen's University, Canada. His previous books include *The Electronic Eye: The Rise of Surveillance Society* (Minnesota, 1994). Elia Zureik is also professor of sociology at Queen's University, Canada, and coedited (with Dianne Hartling) *The Social Context of the New Information and Communication Technologies* (1987).

**Why Punish? How Much?** Michael H. Tonry, 2011 Punishment, like all complex human institutions, tends to change as ways of thinking go in and out of fashion. Normative, political, social, psychological, and legal ideas concerning punishment have changed drastically over time, and especially in recent decades. *Why Punish? How Much?* collects essays from classical philosophers and contemporary theorists to examine these shifts. Michael Tonry has gathered a comprehensive set of readings ranging from Kant, Hegel, and Bentham to recent writings on developments in the behavioral and medical sciences. Together they cover foundations of punishment theory such as consequentialism, retributivism, and functionalism, new approaches like restorative, communitarian, and therapeutic justice, and mixed approaches that attempt to link theory and policy. This volume includes an accessible introduction that chronicles the development of punishment systems and theorizing over the course of the last two centuries. *Why Punish? How Much?* provides a fresh and comprehensive approach to thinking about punishment and sentencing for a broad range of law, sociology, philosophy, and criminology courses.

**Legal and Ethical Implications of Drone Warfare** Michael J. Boyle, 2018-04-19 Over the last decade, the U.S., UK, Israel and other states have begun to use Unmanned Aerial Vehicles (UAVs) for military operations and for targeted killings in places like Pakistan, Yemen and Somalia. Worldwide, over 80 governments are developing their own drone programs, and even non-state actors such as the Islamic State have begun to experiment with drones. The speed of technological change

and adaptation with drones is so rapid that it is outpacing the legal and ethical frameworks which govern the use of force. This volume brings together experts in law, ethics and political science to address how drone technology is slowly changing the rules and norms surrounding the use of force and enabling new, sometimes unprecedented, actions by states. It addresses some of the most crucial questions in the debate over drones today. Are drones a revolutionary form of technology that will transform warfare or is their effect merely hype? Can drone use on the battlefield be made wholly consistent with international law? How does drone technology begin to shift the norms governing the use of force? What new legal and ethical problems are presented by targeted killings outside of declared war zones? Should drones be considered a humane form of warfare? Finally, is it possible that drones could be a force for good in humanitarian disasters and peacekeeping missions in the near future? This book was previously published as a special issue of The International Journal of Human Rights.

**Mastering Public Administration** Jos C. N. Raadschelders, Brian R. Fry, 2022-07-13 Raadschelders and Fry provide a singular investigation into the influence of 10 scholars on contemporary public administration as well as how significant their work continues to be on contemporary research. In a field that is eclectic and pragmatic, it is only fitting that the diversity of the following scholars reflects the diversity of the field of public administration: Max Weber, Frederick W. Taylor, Luther H. Gulick, Mary Parker Follett, Elton Mayo, Chester Barnard, Herbert A. Simon, Charles E. Lindblom, Elinor Ostrom, and Dwight Waldo. The impacts of their personal life experiences on scholarly thought and their ideas about science and a science of public administration are used to enhance an examination of their ideas, concepts, and theories. The writings of such a wide-ranging group of scholars are also connected by a recognition of the growth and organizational independence of the field of public administration. For the Fourth Edition, a new perspective has been included: a review of Elinor Ostrom's work provides valuable new material on organization and decision making that is applicable in many disciplines and across many fields. In addition, substantive updates to the scholarship and analysis found in each of the chapters in the book encourage new avenues for questions, insight, and exploration in the field of public administration.

Loving the Machine Timothy N. Hornyak, 2006-05-25 While the US sponsors robot-on-robot destruction contests, Japan's feature tasks that mimic non-violent human activities. Why is this? What accounts for Japan's unique relationship with robots as potential colleagues in life, rather than potential adversaries? This book answers this query by looking at Japan's historical connections with robots. Japan stands out for its long love affair with robots, a phenomenon that is creating what will likely be the world's first mass robot culture. While US companies have created robot vacuum cleaners and war machines, Japan has

**His Fleece Was White As Snow** One Way Street, Incorporated, 2003-06-01 This children's Easter musical is a sequel to the Christmas musical, Mary Had a Little Lamb. It's about fifty minutes long with all animal characters: four lambs, two

*All the Laws but One* William H. Rehnquist, 2007-12-18 In *All the Laws but One*, William H. Rehnquist, Chief Justice of the United States, provides an insightful and fascinating account of the history of civil liberties during wartime and illuminates the cases where presidents have suspended the law in the name of national security. Abraham Lincoln, champion of freedom and the rights of man, suspended the writ of habeas corpus early in the Civil War--later in the war he also imposed limits upon freedom of speech and the press and demanded that political criminals be tried in military courts. During World War II, the government forced 100,000 U.S. residents of Japanese descent, including many citizens, into detainment camps. Through these and other incidents Chief Justice Rehnquist brilliantly probes the issues at stake in the balance between the national interest and personal freedoms. With *All the Laws but One* he significantly enlarges our understanding of how the Supreme Court has interpreted the Constitution during past periods of national crisis--and draws guidelines for how it should do so in the future.

*The Holy Crown of Hungary* Anthony Endrey, 1978
