**Understanding Action Learning** Judy O'Neil,Victoria J. Marsick,2007-07-11 As much as adult learners can absorb in a classroom, they learn and retain a lot more on the job. Action Learning, or AL, can be based on any of several different schools of thought, and there is much debate as to which is ideal. The authors advocate tailoring the best attributes of each approach to the specific purpose and the learning environment. Drawing on theory from Self-Directed Learning, Learning from Experience, and Transformative Learning, Understanding Action Learning enables the reader to make an informed decision about which approach or combination to use in his or her organization, and provides: \* a theoretical model that explains the different approaches to AL, and a framework for identifying which approach to use \* a focus on co-design in creating Action Learning programs \* practical tools, assessments, and exercises \* illuminating stories and case studies from the field Combining top-shelf research with real-world experience, Understanding Action Learning is a crucial resource for adult educators everywhere.

Standards Deviation James P. Spillane, 2009-06-30 What happens to federal and state policies as they move from legislative chambers to individual districts, schools, and, ultimately, classrooms? Although policy implementation is generally seen as an administrative problem, James Spillane reminds us that it is also a psychological problem. After intensively studying several school districts' responses to new statewide science and math teaching policies in the early 1990s, Spillane argues that administrators and teachers are inclined to assimilate new policies into current practices. As new programs are communicated through administrative levels, the understanding of them becomes increasingly distorted, no matter how sincerely the new ideas are endorsed. Such patterns of well-intentioned misunderstanding highlight the need for systematic training and continuing support for the local administrators and teachers who are entrusted with carrying out large-scale educational change, classroom by classroom. Implementation Reconsidered Appendix: Research Methods References Index Policy implementation is like the telephone game. . . . the player at the start of the line tells a story to the next person in line, who then relays the story to the third person in line. . . . by the time the story is retold by the final player, it is very different from the original. --chapter 1

**Sustainability in Project Management** Gilbert Silvius, Ron Schipper, Julia Planko, Jasper van den Brink, 2017-03-02 The concept of sustainability has grown in recognition and importance. The pressure on companies to broaden their reporting and accountability from economic performance for shareholders, to sustainability performance for all stakeholders is leading to a change of mindset in consumer behaviour and corporate policies. How can we develop prosperity without compromising the life and needs of future generations? Sustainability in Project Management explores and identifies the questions surrounding the integration of the concepts of sustainability in projects and project management and provides valuable guidance and insights. Sustainability relates to multiple perspectives, economical, environmental and social, but also to responsibility and accountability and values in terms of ethics, fairness and equality. The authors will inspire project managers to be aware of these considerations, and to apply them to the role they play in projects, not just 'doing things right' but 'doing the right things right'.

Human Inquiry Peter Reason, John Rowan, 1981-08-25 Sets forth a new paradigm for the philosophy and practice of research in fields of human activity: a collaborative, experimental approach in which inquiry is firmly rooted in subjects' experience of their lives. Covers the philosophy, methodology, practice and prospects of the new paradigm, showing how to do research with people rather than on people. Synthesizes material from researchers pursuing similar paths in Europe, North America, Africa and India as well as relevant reprints and appreciations of classical material.

*Minding the Weather* Robert R. Hoffman, Daphne S. Ladue, H. Michael Mogil, Paul J. Roebber, J. Gregory

Trafton,2023-08-15 A detailed study of research on the psychology of expertise in weather forecasting, drawing on findings in cognitive science, meteorology, and computer science. This book argues that the human cognition system is the least understood, yet probably most important, component of forecasting accuracy. *Minding the Weather* investigates how people acquire massive and highly organized knowledge and develop the reasoning skills and strategies that enable them to achieve the highest levels of performance. The authors consider such topics as the forecasting workplace; atmospheric scientists' descriptions of their reasoning strategies; the nature of expertise; forecaster knowledge, perceptual skills, and reasoning; and expert systems designed to imitate forecaster reasoning. Drawing on research in cognitive science, meteorology, and computer science, the authors argue that forecasting involves an interdependence of humans and technologies. Human expertise will always be necessary.

The Future of the Public Sector Edward William Russell,1991 The new right ideology and its privatisation ramifications are essentially an imported phenomenon. It is often overlooked that Australia's tradition of public enterprise is older and more far-reaching than that of most other countries and that privatisation is still not supported by the majority of Australians. Is there an alternative future for the public sector? This group of essays explains why.
