## OECD

### **OECD Science, Technology and Innovation Outlook 2018 Adapting to Technological and Societal Disruption**

OECD, 2018-11-19 The OECD Science, Technology and Innovation Outlook 2018 is the twelfth edition in a series that biennially reviews key trends in science, technology and innovation (STI) policy in OECD countries and a number of major partner economies. The 14 chapters within this edition look at a range of ...

**Tribes** Joel Kotkin, 1993 This explosive and controversial examination of business, history, and ethnicity shows how global tribes have shaped the world's economy in the past--and how they will dominate its future. From the Trade Paperback edition.

The Second World Parag Khanna, 2008-03-04 Grand explanations of how to understand the complex twenty-first-century world have all fallen short--until now. In *The Second World*, the brilliant young scholar Parag Khanna takes readers on a thrilling global tour, one that shows how America's dominant moment has been suddenly replaced by a geopolitical marketplace wherein the European Union and China compete with the United States to shape world order on their own terms. This contest is hottest and most decisive in the Second World: pivotal regions in Eastern Europe, Central Asia, Latin America, the Middle East, and East Asia. Khanna explores the evolution of geopolitics through the recent histories of such underreported, fascinating, and complicated countries as Azerbaijan, Uzbekistan, Colombia, Libya, Vietnam, and Malaysia--nations whose resources will ultimately determine the fate of the three superpowers, but whose futures are perennially uncertain as they struggle to rise into the first world or avoid falling into the third. Informed, witty, and armed with a traveler's intuition for blending into diverse cultures, Khanna mixes copious research with deep reportage to remake the map of the world. He depicts second-world societies from the inside out, observing how globalization divides them into winners and losers along political, economic, and cultural lines--and shows how China, Europe, and America use their unique imperial gravities to pull the second-world countries into their orbits. Along the way, Khanna also explains how Arabism and Islamism compete for the Arab soul, reveals how Iran and Saudi Arabia play the superpowers against one another, unmasks Singapore's inspirational role in East Asia, and psychoanalyzes the second-world leaders whose decisions are reshaping the balance of power. He captures the most elusive formula in international affairs: how to think like a country. In the twenty-first century, globalization is the main battlefield of geopolitics, and America itself runs the risk of descending into the

second world if it does not renew itself and redefine its role in the world. Comparable in scope and boldness to Francis Fukuyama's *The End of History and the Last Man* and Samuel P. Huntington's *The Clash of Civilizations and the Remaking of World Order*, Parag Khanna's *The Second World* will be the definitive guide to world politics for years to come. "A savvy, streetwise primer on dozens of individual countries that adds up to a coherent theory of global politics." -Robert D. Kaplan, author of *Eastward to Tartary and Warrior Politics* "A panoramic overview that boldly addresses the dilemmas of the world that our next president will confront." -Dr. Zbigniew Brzezinski, former national security advisor Parag Khanna's fascinating book takes us on an epic journey around the multipolar world, elegantly combining historical analysis, political theory, and eye-witness reports to shed light on the battle for primacy between the world's new empires. -Mark Leonard, Executive Director, European Council on Foreign Relations Khanna, a widely recognized expert on global politics, offers an study of the 21st century's emerging geopolitical marketplace dominated by three first world superpowers, the U.S., Europe and China... The final pages of his book warn eloquently of the risks of imperial overstretch combined with declining economic dominance and deteriorating quality of life. By themselves those pages are worth the price of a book that from beginning to end inspires reflection. -Publishers Weekly

**The Next Decade** George Friedman, 2011-01-25 The author of the acclaimed New York Times bestseller *The Next 100 Years* now focuses his geopolitical forecasting acumen on the next decade and the imminent events and challenges that will test America and the world, specifically addressing the skills that will be required by the decade's leaders. In the long view, history is seen as a series of events—but the course of those events is determined by individuals and their actions. During the next ten years, individual leaders will face significant transitions for their nations: the United States' relationships with Iran and Israel will be undergoing changes, China will likely confront a major crisis, and the wars in the Islamic world will subside. Unexpected energy and technology developments will emerge, and labor shortages will begin to matter more than financial crises. Distinguished geopolitical forecaster George Friedman analyzes these events from the perspectives of the men and women leading these global changes, focusing in particular on the American president, who will require extraordinary skills to shepherd the United States through this transitional period. *The Next Decade* is a provocative and fascinating look at the conflicts and opportunities that lie ahead.

*Geofusion* Norbert Csizmadia, 2019-02-07 We are living in a unique geo age, where geography is appreciated again. The 21st century encompasses political and economic games where the multi-polar world, a new world order, and a new value system combine to develop new actors and new Industries. Business leaders are focusing more and more on global social issues, putting pressure on international political decisions such as the Space Race, global warming and migration. The 21st century is the era of knowledge & creativity (technology + knowledge + geography = techknowledgegeography or Geofusion) where education and innovation are the most important investment. Knowledge is the currency of the future. When drawn

with knowledge, the map of 21st century can be utilized to discover and conform to this new world! This book helps to explain how 'Geofusion' provides the opportunities, which can give lasting value to the world.
